INTRODUCTION

At Cohehre 2014 you will get an introduction to Quantified Self (QS) and will use its tools to discover what you can do to monitor your health, and maybe even improve it. During the week you will perform an experiment with and on conference members to become familiar with the use of QS. At the end of the week you will present your findings in debates and presentations – actively discussing the results and findings of your experiment. Throughout the week there will be field visits to interesting institutes where you will get to know the practical side of this year’s topics.

You will work with students from different countries and different disciplines. The focus will not only be on learning, but also on exploring the city of Groningen.

Groningen is a vibrant city in the north of the Netherlands. It’s a small city where a lot of students live. There are many cultural and social events during the year and its nightlife is quite famous. In between the lectures and presentations, we will explore the city ‘Dutch style’ (by bike) and discover its nightlife. This way you will get to know the city and each other.

STUDENT PROGRAM

Monday 7th April 2014

17.00-18.00  Registration
18.00-19.00  Welcome by dean
19.00-20.00  Explanation week program
